Subject: Service Oriented Architecture (IT502-N)

Practical - 6

Aim: Create a Hello Web Services using netbeans:

Code for Hello Web Services:

package aa;

Name : Makhija Ashish Enrollment No : 19BEIT3005 Subject : Service Oriented Architecture (IT502-N)

Method returned

SDAP Record

java.log.String: "Bello Johann !"

```
import javax.jws.WebService;
import javax.jws.WebMethod;
import javax.jws.WebParam;
 @WebService(serviceName = "SOA_P6")
public class SOA_P6 {
             @WebMethod(operationName = "hello")
            public String hello(@WebParam(name = "name") String txt) {
                        return "Hello " + txt + "!";
             }
 } ☐ Output.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   P- 0000
